

BOUNDING BOX REFINEMENT AGENT FOR OVERLAPPING OBJECTS

A progress report for End-Sem Evaluation Phase-I
Of
M. Tech (Signal Processing) 2020-2022
By
Anindya Ghosal (2020PSP3007)

Under the supervision
of
Prof. Jyotsna Singh

Division of Electronics & Communication Engineering
NETAJI SUBHAS UNIVERSITY OF TECHNOLOGY
(Formerly NSIT)
NEW DELHI-110078

CERTIFICATION

This is to certify that this report titled “**Bounding Box Refinement Agent for Overlapping Object Detection**” being submitted by ANINDYA GHOSAL (2020PSP3007) to the Division of Electronics and Telecommunication Engineering, Netaji Subhas University of Technology (NSUT) for the end semester dissertation evaluation for the award of M. Tech. degree, is record of bona-fide work carried out by him under the supervision and guidance. The matter embodied in this report has not been submitted for the award of any other degree.

Supervisor

Prof. Jyotnsa Singh
Division of ECE,
NSUT, New Delhi, India

Acknowledgement

I would like to express our sincere gratitude to Prof. Jyotsna Singh, Department of Electronics and Communication Engineering, Netaji Subhas University of Technology, for granting me this chance to work on a trending research area as a part of my Master's Thesis Project.

Without her thoughtful guidance, meticulous supervision, and incessant encouragement, this thesis would not have emerged as it has. Her insights and experience have been the guiding source for our research and study. I would also like to thank the entire Department of ECE for providing an opportunity to study this project and enhance my knowledge on relevant industrial skills. I also want to thank the department for ensuring an environment conducive to learning.

This project has not only provided me with in-depth knowledge of relevant and new-age technologies but also provided a platform for me to work together with her as a team. I would like to thank my parents for encouraging and supporting me in the pursuit of my thesis work.

ANINDYA GHOSAL
2020PSP3007

List of figures

1) Agent-Environment Interaction in a MDP.....	8
2) MDP on a simple workday.....	11
3) Bounding Box example.....	16
4) Top-Left, Bottom-Right method of bounding box.....	16
5) Bounding Box wrt center, height and width.....	17
6) Layer Architectures of ResNet.....	19
7) Skip Connections.....	20
8) ResNet Architecture.....	21
9) DQN representation.....	22
10) Exploded View of DQN.....	23
11) YOLOv1 Architecture.....	25
12) YOLOv2 Architecture.....	25
13) YOLOv3 Architecture.....	26
14) BAR Agent Workflow.....	27
15) IoU and Q Value Plots of experiments.....	30-34

Contents

1. Introduction.....	1
2. Literature Review.....	4
3. Problem statement.....	28
4. Methodology.....	29
5. Results and Discussions.....	30
6. Conclusion.....	36
7. Future Work.....	37
8. References.....	38
